

Joshua Kim

Software Engineer

Valley Stream, NY | 516.282.4789 | joshkim057@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

From the galleries of fine art to the seas of logistics, my career has taken me into software engineering to explore the building blocks of our society. The passion with which I delved into supporting streaming and creative talent has driven me to gain opportunities and learn to code in this time of incredible growth.

SKILLS

HTML5, CSS, Javascript, React.js, MongoDB, Mongoose.js, Node.js, Github, Adobe Programs (Photoshop, Illustrator), OPUS Logistics and FreightStream

PROJECTS

RobotMan: Front-end game developed with HTML, CSS and Javascript ES6 with start screen overlay and CSS Grid layout that revealed personal illustrations that directly responds to user input.

Beer Here: Front-end app built with React.js and an open-source JSON formatted API to display an easy-to-read list of breweries in popular cities as well as an open search function.

Image Board: Full stack application with frontend displaying images with CRUD functionality and backend database to store images and users, made in collaboration with a team.

Fight Game: Front-end game built and designed in React.JS and Animate.css which animates personal illustrations that represent player models animations and personal illustrations

EXPERIENCE

General Assembly - Software Engineering Fellow

Apr 2021 - Jul 2021

- Spent 40+ hours a week learning and creating apps with responsive design principles.
- Crafted backend databases that stored, added, updated, displayed and deleted data with APIs.
- Created fullstack applications with React.js, Mongoose and kept version control with GitHub.
- Trained in software development life-cycle practices during web application development.

Sumisho Global Logistics - Import Logistics Coordinator

Nov 2018 - Nov 2020

- Analyzed data and created reports to provide fiscal estimates and predictions which led to increased efficiency.
- Developed situation planning for complex shipments with cost-effective solutions which increased client satisfaction
- Collaborated on new standard operating procedures and reduced costs by thousands of dollars per year.
- Organized flexible plans and price analysis for time sensitive cargo which minimized penalties and reduced overhead costs.

R & R Leather, Inc. - Domestic Shipping Specialist

Aug 2017 - Sep 2018

- Fulfilled domestic shipping orders and assembled packaging for retail and ecommerce clients.
- Ensured incoming product matched customer orders by evaluating inventory and shipping orders.
- Reported to management with weekly reports regarding urgent orders, which increased client satisfaction.

EDUCATION

General Assembly / Software Engineering Immersive

Graduated July 2021

School of Visual Arts / BFA Illustration

Graduated May 2012
